

BRAND GUIDELINES

Introduction

A Guide to Using Our Visual Identity System

This document serves as the official guide to using our brand's visual identity. It outlines the core elements that define how our brand is presented to the public, ensuring a consistent and professional appearance across all forms of communication.

Whether you're creating marketing materials, digital assets, or internal documents, these guidelines provide clear direction on how to apply our brand assets correctly. Consistency in branding builds recognition, trust, and clarity.

Following these standards helps present our organization as cohesive, reliable, and easily identifiable across all touchpoints.

Brandmark

Always use the master logo files provided. Never redraw, stretch, alter proportions, or apply effects such as shadows, gradients, or filters to the logo.

The brandmark must appear exactly as intended to preserve the brand's integrity.

Our logo is the primary visual representation of our brand. It has been carefully designed to function across various sizes, formats, and platforms, from digital interfaces to print materials and physical merchandise.

Nimzo DataTM

Submark

The submark is a simplified version of our main logo. It is designed for small-scale use cases where the primary logo would not be legible or practical.

This compact version allows for brand visibility while maintaining design clarity in space-limited applications.

Only use submark on the items below:

- Social media profile pictures
- Website favicons
- Website footers
- Email signatures
- Watermarks
- Smaller merchandise

Circle usage

16 px

Clear Space

As a rule, maintain a clear space equal to the height of the logotype (x) on all sides. No text, images, graphics, or layout elements should encroach into this space.

Clear space is the minimum required area around the logo that must remain free of other visual elements. This buffer protects the logo's legibility and ensures it maintains its impact in all layouts.

Maintain a clear space around the logo equivalent to the height of the logomark at a minimum.

Positive & Negative

Our logo is available in both positive and negative versions to maintain clarity and contrast across different backgrounds.

The positive version is intended for use on light or white backgrounds, while the negative version is designed for dark or colored backgrounds.

Negative grayscale version

Typeface

Our carefully selected typography ensures a consistent style and appearance of text across all our brand communications, reflecting our brand's personality traits.

By adhering to our chosen typography, we maintain our brand identity and provide exceptional experiences to our audience.

Brand Colors

Our brand color palette is designed to create a distinctive and unified appearance across all brand materials.

Each color has been defined for both print and digital environments, using CMYK, RGB, and HEX to ensure accurate reproduction.

Use these colors consistently in backgrounds, text, icons, and graphical elements to create a cohesive and recognizable visual presence.

Web Icons

Icons are used to enhance communication by visually representing concepts in a simple, immediate way.

Our icon style is minimal, consistent, and aligned with the overall brand identity.

Imagery Style

Our images not only inspire but also add significant value, encompassing a range of desirable qualities that resonate with our brand's ethos.

They contribute to the development of our brand, reflecting a sense of relevance and engagement while maintaining an appealing presence.

Logo Misusage

To preserve the integrity and professionalism of our brand, the logo must never be altered or used inappropriately. Incorrect usage can dilute brand recognition and create confusion.

Here are examples of unacceptable logo arrangements.

DO NOT
rotate elements

DO NOT
add special effects to the logo

DO NOT
re-type logo

DO NOT
change the official color

DO NOT
distort or skew the logo

DO NOT
place the logo with bad contrast
